Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claim 9-13 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 9-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Russ et al. (US 2004/0060063).

Regarding Claim 9: Russ et al. discloses a playback apparatus for playing back a digital stream generated by multiplexing a graphics stream and a video stream, wherein the graphics stream includes one or more interactive control segments and one or more graphics data pieces, each interactive control segment includes a plurality of sets of page information, each set of page information includes one or more button information pieces, each button information piece (i) realizes an interactive screen structure by displaying each graphics data piece as a state of a corresponding graphics button material, and (ii) includes a set command, the playback apparatus comprises: a

Art Unit: 2621

decoding unit obtaining a page including a plurality of graphics button materials by decoding the graphics stream (**paragraph 0062 and fig. 4**); a page number register storing therein a page number of a current page (**paragraph 0084**); a button number register storing therein a button number of a current button, which is one of the button materials in a selected state on the current page (**paragraph 0121 and fig. 39**); and a transition control unit executing a predetermined procedure, when a selection of one of the button materials on the current page is confirmed, the decoding unit executes a set command that sets a new number in the page number register and/or the button number register (**paragraph 0062 and fig. 39**), and the predetermined procedure includes (i) judging whether the button number in the button number register is an invalid button number that does not exist in one of the sets of page information that corresponds to the current page (**paragraph 0078**), and (ii) if the button number is the invalid button number, setting the button number register to an alternative button number (**paragraph 0078 and 0111**).

Regarding Claim 10: Russ et al. discloses a playback apparatus of Claim 9, wherein the alternative button number is a first number out of valid button numbers in a set of page information that corresponds to the current page (**paragraph 0111 and fig. 34**).

Regarding Claim 11: Russ et al. discloses a playback apparatus of Claim 9, wherein the graphics stream and the video stream have been recorded on a recording medium, and the transition control unit executes the predetermined procedure after initializing the button number register to an invalid button number that does not exist in any of the sets

Art Unit: 2621

of page information when the recording medium is loaded to the playback apparatus
(paragraph 0111).

Regarding Claim 12-13: Claim 12-13 are reject for the same subject matter as claims 9 discussed above.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
